PROFESSIONAL SUMMARY

IT professional returning to the workforce with 11 years of enterprise IT: five years at Tata Consultancy Services, three at IBM Global Business Services and three at Infosys, working across IBM mainframe tools and languages — customer-facing delivery, offshore coordination and multiple application ownerships. From 2016 he built and ran his own business on his savings while simultaneously serving as a school teacher — a decade of ownership, discipline and communication. Now seeking a stable IT support / production support / operations role where reliability, maturity and enterprise-grade work habits matter more than recent stack currency.

TECHNICAL SKILLS

IBM Mainframe tools & languages — COBOL · JCL · DB2 · CICS · VSAM · Production Support · Incident Handling · Offshore Coordination · Client Communication · SDLC · Business Operations (self-founded) · Teaching & Mentoring

PROFESSIONAL EXPERIENCE

Software Engineer — Infosys

2012 – 2015 (3 years)

- Enterprise application development and support on IBM mainframe tools and languages

Senior Software Engineer — IBM Global Business Services, Kolkata

2009 – 2012 (3 years)

- Offshore leadership for global client accounts
- Direct interaction with customers across multiple global geographies
- Multiple application ownerships — end-to-end delivery and stewardship
- Worked across IBM mainframe tools and languages

Software Engineer — Tata Consultancy Services (TCS)

2004 – 2009 (5 years)

- IBM Mainframe Technologies
- Strong customer-facing role; onsite–offshore model projects
- Leadership exposure

SECOND CAREER — ENTREPRENEUR & EDUCATOR

Business Owner & School Teacher — Self-Employed

2016 – Present

- Founded and operated a self-funded business, built from his own savings
- Concurrently served as a school teacher — a decade of responsibility, communication and daily discipline running alongside

EDUCATION

B.Tech, Computer Science & Engineering — National Institute of Technology (NIT), Silchar
Batch of 2004
